

“Our flagship product is a patent pending tooth brushing system designed to simultaneously clean a set of maxilla teeth or a set of mandible teeth in less than 30 seconds.”

Founded in 2008, Orius Innovations develops products and applications for the over \$9B oral health care market, with whitening strips and electric toothbrushes being the driving force for new product growth.

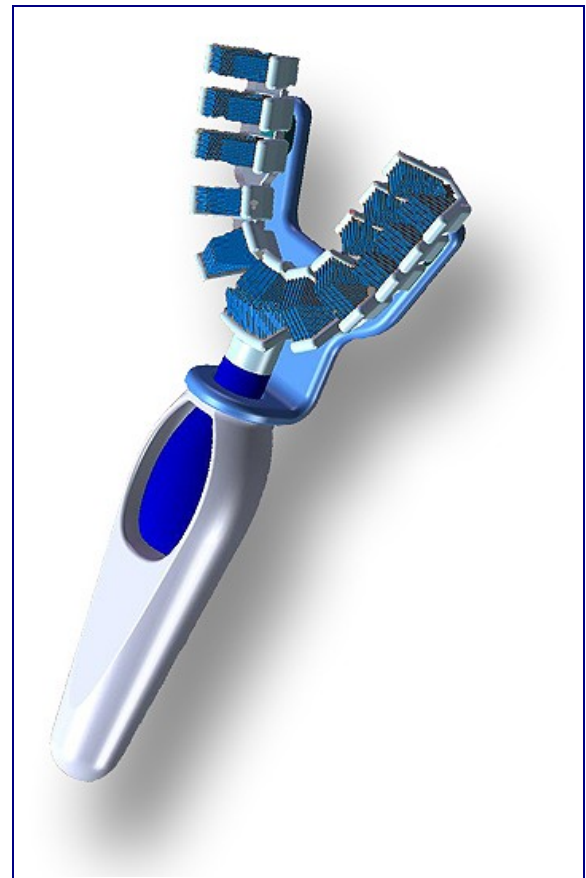

Based on its proprietary tooth brushing technology, our automatic dental cleaning system is designed to provide a breakthrough product for people with impaired dexterity:

- **50 million** Americans Report Some Level of Disability
- **45 million** Children in the US
- **40 million** Seniors in the US
- **2.9 million** Disabled Veterans
- **2.0 million** Nursing Home Patients
- **1.5 million** Assisted Living Patients

We expect to grow our business significantly over the next few years, creating a differentiated offering for our customers, potential partners and investors.
